1 Introduction

The Inland Revenue Authority of Singapore (IRAS) provides application programming interface (API) services to allow application developers to submit and retrieve tax related matters using HTTP requests. Most of the APIs will be in the form of a JSON web service which reduces client/server coupling and thus enabling easier integration between IRAS' services with external developers.

While some services require a simple GET, others may be secured and require credentials that can be passed via HTTP header parameters which are as follows :

X-IBM-Client-Id	String containing the Client ID of the application invoking IRAS API. This value will be provided to the application vendor by IRAS. E.g. a1234b5c-1234-abcd-efgh-a1234b5cdef
X-IBM-Client-Secret	String containing the Client Secret of the application invoking IRAS API. This value will be provided to the application vendor by IRAS. E.g. a12345bC67e8fG9a12345bC67e8fG9a12345bC67e8fG9

This document serves to help developers consume IRAS API services.

2 Registration at API Marketplace

Developers are required to test APIs in the Sandbox environment first, before using them in Production. Create a developer account at <https://apisandbox.iras.gov.sg/> to subscribe to IRAS APIs for Sandbox Testing, and a developer account at <https://apiservices.iras.gov.sg/> to subscribe to IRAS APIs for Production use.

A computer-generated email will be sent to the subscriber's email account for account activation of the API Marketplace.

Refer to <https://go.gov.sg/iras-apiuserguide> for more details on how to get started.

3 API Services

The table below shows the name and description of the API service and its endpoints. Use the correct endpoint when consuming the API in the respective environments.

Name of API Service	Description	Endpoint
Edit Past GST Return (GST F7)	This API allows accounting software developers to incorporate within their accounting software the feature for authorised taxpayers to validate and submit GST F7 (Correcting Errors made in GST Return) information to IRAS directly.	For Sandbox Testing: https://apisandbox.iras.gov.sg/iras/sb/gst/submitF7ReturnCorpPass
		For Production Usage: https://apiservices.iras.gov.sg/iras/prod/gst/submitF7ReturnCorpPass

3.1 Network Security

The API endpoint has to be triggered from a Server-to-Server connection. Transport Layer Security (TLS) and IP Whitelisting will be used to secure end-to-end communications between the server invoking the API and IRAS API Gateway.

Your server, software or application must be able to:

1. Support the following protocols: HTTP/ 2, TLS 1.2/ 1.3, and
2. Trigger HTTP/ GET and HTTP/ POST requests.

3.3 General Usage

Each API submission is limited to no more than 2 MB in total data size.

3.4 Sandbox Usage

API services in the Sandbox environment are designed to mimic the Production environment so that developers can perform integration tests on the API before consuming actual data from the Production environment.

You are required to perform Sandbox Testing before you can use the API service in Production. Test scenarios shall be provided to you separately for you to complete. However, completion of the test scenarios does not automatically mean that your application has been validated or approved by IRAS.

After a successful sandbox submission, a reference number will be generated and provided within the API response.

3.5 Production Usage

Approval **is required** to use this service in both the Sandbox and Production environments. After approval is granted by IRAS, the client application can successfully consume the API.

Use of IRAS API(s) are governed by the [Additional API Terms of Use](#) found at the API Marketplace.

The use of IRAS API(s) in the Production environment is only intended for the purpose as indicated in the API service description. Any other forms of use, **including all forms of tests**, are strictly prohibited. In the event such activities are found to have occurred in the Production environment, you will be deemed to have breached the API Terms of Use, which may result in the suspension or termination of your account.

3.6 Common Interface Information

- JSON is case sensitive by specifications.
- All date strings are to be represented in compliance to the [ISO-8601](#) standard.
- All string fields are subject to validation of the following acceptable characters that is allowed (in red):
 - [a-zA-Z0-9'@#()\-./&+_%\$] (**Note:** whitespace is included)
- All properties follow the camel-case convention.
- Unless stated as optional, all JSON object properties must be specified.
- Unless otherwise specified, all JSON services are invoked using HTTP verb POST.
- All input data format are as specified like the following:

Data Type and Size	Description	Example
String(12)	A string containing maximum 12 characters.	"S1234567Z"
Number(4)	A numeric value containing maximum 4 whole numbers.	1990
Number(4,2)	A numeric value containing maximum 4 whole numbers and two decimal places	1234.56
Boolean	Indicator for bool value: true or false	true

3.7 Common Response Payload

All response payloads share the following common fields:

Parameter Name	Data Type	Description
data	Object	The data property will be populated differently based on the API that is being invoked.
returnCode	Integer	10 : Success - The request was successfully processed. 30 : Failure - The request was not processed. Refer to “info” object for error information.
Info	Object	This complex object holds any diagnostic information that will allow developers to debug their failed requests.
info.message	String	Diagnostic message in the event of error.
Info.messageCode	Integer	Integer code signifying the type of error or warning. 850300 : Request object is null – The incoming JSON request is null. 850301 : Arguments error – There is an error with one of the arguments provided. 850302 : Generic error – There is an exception within the service. 850303 : Service is inactive. 850304 : Service is not authorized for usage based on the provided credentials. 850305 : Invalid test user – The input fields provided are not valid for sandbox testing.
info.fieldInfoList	Array	An array for FieldInfo objects. <i>Note: Refer to section 4.5 for the list of diagnostic messages.</i>
info.fieldInfoList.field	String	Name of the field that resulted in the error.
Info.fieldInfoList.message	String	Diagnostic message provided to aid consumer’s developers.

4 Edit Past GST Return (GST F7) API Service

4.1 API Endpoint

Method	Endpoint
POST	/gst/submitF7ReturnCorpPass

4.2 Request Payload

Parameter Name	Data Type	Mandatory/ Optional / Conditional	Description
filingInfo	Object	Mandatory	Mandatory
taxRefNo	String(30)	Mandatory	Tax Reference Number of Company/Business
formType	String(2)	Mandatory	Form Type of the GST Return
dtPeriodStart	String(10)	Mandatory	Start Period covered by this return (yyyy-MM-dd)
dtPeriodEnd	String(10)	Mandatory	End Period covered by this return (yyyy-MM-dd)
supplies	Object	Mandatory	
totStdSupply	Number(14)	Mandatory	Box 1: Total value of standard-rated supplies
totZeroSupply	Number(14)	Mandatory	Box 2: Total value of zero-rated supplies
totExemptSupply	Number(14)	Mandatory	Box 3: Total value of exempt supplies
purchases	Object	Mandatory	
totTaxPurchase	Number(14)	Mandatory	Box 5: Total revised value of taxable purchases (exclude expenses where input tax is disallowed)
taxes	Object	Mandatory	
outputTaxDue	Number(14,2)	Mandatory	Box 6: Revised output tax
inputTaxRefund	Number(14,2)	Mandatory	Box 7: Revised input tax and refunds claimed (exclude disallowed input tax)
prevGSTPaid	Number(14,2)	Mandatory	Box 9: Less: Net GST paid /claimed previously for this accounting period

4.3 Declaration Section

Submission of GST Return requires a declaration by an authorised representative for the submission to be successfully processed. It is required that a declaration section is displayed in a User Interface of the Software, for the authorised representative to provide their declaration **before submitting the GST Return to IRAS.**

The declaration captured through the declaration section should be reflected on to the following API parameters in the request payload. The declarant name and declarant ID will not be required as the information is based on CorpPass login credentials.

Parameter Name	Data Type	Description	Parameter Name
declaration	Object	Mandatory	
declareTrueCompleteChk	Boolean	Mandatory	I declare that the information provided in this return is true and complete.
declareIncRtnFalseInfoChk	Boolean	Mandatory	I understand that penalties may be imposed for the submission of an incorrect return and/or provision of false information to the Comptroller of GST.
declarantDesgtn	String(60)	Mandatory	Declarant Designation

Sample User Interface Declaration Section

Declaration

I declare that the information provided in this return is true and complete. *

I understand that penalties may be imposed for the submission of an incorrect return and/or provision of false information to the Comptroller of GST. *

4.4 Response Payload

Parameter Name	Data Type	Description
data	Object	The object payload containing the reference code of successful submission
filingInfo	Object	
ackNo	String(20)	Acknowledgement number of successful submission
companyName	String(100)	Name of Company/Business
dtPeriodStart	String(10)	Start Period covered by this return (yyyy-MM-dd)
dtPeriodEnd	String(10)	End Period covered by this return (yyyy-MM-dd)
dtSubmission	String	Date and Time of Submission (yyyy-MM-dd'T'HH:mm:ss)
formType	String(2)	Form Type of the GST Return
gstRegNo	String(30)	GST Registration Number of Company/Business
pymtRefNo	String(16)	Payment Reference Number, if any
taxRefNo	String(30)	Tax Reference Number of Company/Business
supplies	Object	
totStdSupply	Number(14)	Box 1: Total value of standard-rated supplies
totZeroSupply	Number(14)	Box 2: Total value of zero-rated supplies
totExemptSupply	Number(14)	Box 3: Total value of exempt supplies
totValueSupply	Number(15)	Box 4: Total value of Boxes (1) + (2) + (3) (IRAS Derived Field)
purchases	Object	
totTaxPurchase	Number(14)	Box 5: Total value of taxable purchases (exclude expenses where input tax is disallowed)
taxes	Object	
outputTaxDue	Number(14,2)	Box 6: Output tax due
inputTaxRefund	Number(14,2)	Box 7: Less: Input tax and refunds claimed (exclude disallowed input tax)

netGSTPaid	Number(14,2)	Box 8: Equals: Net GST to be paid to/ claimed from IRAS
prevGSTPaid	Number(14,2)	Box 9: Less: Net GST paid/ claimed previously for this accounting period
netDifference	Number(14,2)	Box 10: Equals: Difference to be paid to / claimed from IRAS
schemes	Object	
totValueScheme	Number(14)	Box 11: Total value of goods imported under import GST suspension schemes (e.g. Major Exporter Scheme/ Approved 3rd Party Logistics Company)
touristRefundChk	Boolean	Box 12: Did you claim for GST you had refunded to tourists?
touristRefundAmt	Number(14,2)	Box 12: Tourist Refund Amount
badDebtChk	Boolean	Box 13: Did you make any bad debt relief claims and/or refund for reverse charge transactions?
badDebtReliefClaimAmt	Number(14,2)	Box 13: : Bad Debt Relief Claims and/or refund for reverse charge Amount
preRegistrationChk	Boolean	Box 14: Did you make any pre-registration claims?
preRegistrationClaimAmt	Number(14,2)	Box 14: Pre-registration Claims Amount
revenue	Object	
revenue	Number(14)	Box 15: Revenue for the accounting period
RCElectronicMktplaceOpr	Object	
RCChk	Boolean	Box 16: Did you import services subject to GST under Reverse Charge?
totImpServAmt	Number(14)	Box 16: Value of imported services subject to reverse charge
OVRChk	Boolean	Box 17: Did you operate an electronic marketplace to supply digital services subject to GST on behalf of third-party suppliers?
totDigitalServAmt	Number(14)	Box 17: Value of digital services supplied by electronic marketplace
igdScheme	Object	
defImpPayableAmt	Number(14,2)	Box 18: Revised deferred import GST payable
prevDefImpGSTPayable	Number(14,2)	Box 19: Less: Deferred import GST payable previously declared for this accounting period

diffDefImpGSTPayble	Number(14,2)	Box 20: Equals: Difference in deferred import GST payable
diffDefImpNetGST	Number(14,2)	Box 21: Add: Difference in Net GST (per box 10 above)
diffDefTotalTaxAmt	Number(14,2)	Box 22: Equal: Difference in total tax to be paid to /claimed from IRAS
defTotalTaxAmt	Number(14,2)	Box 23: Revised total tax to be paid to / claimed from IRAS (Box 8 + Box 18)
defTotalGoodsImp	Number(15)	Box 24: Total value of goods imported under the Import GST Deferment Scheme
ErrorDescription	Object	
descriptionOfError	String(200)	Description of Errors
declaration	Object	
declareTrueCompleteChk	Boolean	I declare that the information provided in this return is true and complete.
declareIncRtnFalseInfoChk	Boolean	I understand that penalties may be imposed for the submission of an incorrect return and/or provision of false information to the Comptroller of GST.
declarantID	String(30)	Declarant ID (Masked) from CorpPass login credentials
declarantName	String(100)	Declarant Name from CorpPass login credentials
declarantDesgtn	String(60)	Declarant Designation
contactPerson	String(100)	Contact Person
contactNumber	String(8)	Contact Telephone Number
contactEmail	String(50)	Contact Email
reasons	Object	
grp1BadDebtRecoveryChk	Boolean	TotStdSupply less than OutputTaxDue - Bad Debt Recovery
grp1PriorToRegChk	Boolean	TotStdSupply less than OutputTaxDue - Prior To Registration
grp1OtherReasonChk	Boolean	TotStdSupply less than OutputTaxDue - Other Reasons
grp1OtherReasons	String(200)	TotStdSupply less than OutputTaxDue - Other Reasons Specification
grp2TouristRefundChk	Boolean	TotTaxPurchase less than InputTaxRefund - Tourist Refund

4.5 List of Diagnostic Messages

The table below contains the list of diagnostic messages that would be returned as a response in case of failure during the processing of the Edit Past GST Return (GST F7). As per [section 3.7](#), these diagnostic messages will be part of the information within the info.fieldInfoList array.

Field	Message
filingInfo	<ul style="list-style-type: none"> • API: Value cannot be null, empty, or white space • API: You are not authorised to use the API service • API: We are unable to process the GST Return as it was submitted after the statutory time limit • API: Form GST F7 cannot be processed as the return for the accounting period is still outstanding. • API: You do not need to file GST F7 for this period as you may correct the errors in your next GST F5 return. Refer to our e-Tax Guide 'GST: Taxing imported services by way of an overseas vendor registration regime' for more information on correction of errors • API: You do not need to file GST F7 for this period. If you have made errors in your GST return, please send us an email using 'myTax Mail' via myTaxPortal
taxRefNo	<ul style="list-style-type: none"> • API: Value cannot be null, empty, or white space and must not exceed maximum length • API: Invalid character(s) found • API: No match data found • We are unable to authenticate your organisation's account. The account information is unavailable in IRAS' system. Email gst@iras.gov.sg or call 1800 3568633 for assistance. • The ASGD/ITR/UF that is linked to your authorisation record is invalid. Contact your CorpPass Administrator to check your authorisation record at CorpPass. • Your authorisation record is linked to multiple ASGD/ITR/UF numbers. Contact your CorpPass Administrator to link your authorisation record in CorpPass to only one ASGD/ITR/UF number.
